Precipitation probability					
60%	60%	70%	60%	20%	20%

Forecast for Sunday 10 Sep 2023

Weather: Low confidence in detail surrounding heavy and potentially thundery showers. Cloudy, with an increasing chance of torrential heavy showers or thunderstorms arriving from the south through the morning. From mid-afternoon showers or thunderstorms are likely to start fading away, leaving a drier evening with some low cloud spreading in from the west later.

Chance of cloud-free hill tops above 600m: 80% but possibly falling to 40% from the west by evening.

Low cloud and visibility: Generally good and certainly less hazy than recent days, though poor to very poor at times under heavy rain and thundery downpours with cloud bases dipping over the highest summits. Perhaps becoming moderate in places during the evening, with cloud base as low as 600m in the west.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Sudden deteriorations likely in and around thunderstorms, with gusty winds, lightning and hail also a hazard so extra care required.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sun 10 Sep 2023	0mm	0mm	0mm

Forecast for Monday 11 Sep 2023

Weather: Low cloud through the early hours bringing rain and drizzle through the morning, especially to western hills. Cloud breaking to some brighter intervals by the afternoon with further showers, again heavy and thundery and mostly confined to the north of the Park. Showers easing by late evening to leave a largely dry night.

Maximum wind: Southwesterly 15-25mph.

Chance of cloud-free hill tops 600m: 40% perhaps increasing to 60% by the afternoon.

Low cloud and visibility: Low cloud with bases down to 400-500 m through the morning, lifting slightly through the afternoon but dropping back lower down to 400 m in any heavy showers. Poor visibility in lower cloud and showers, improving to good outside of any showers.

Temperature: **Valleys:** Plus 22 Celsius.
At 600m: Plus 16 Celsius.
Freezing level: Above summits.
